Check repair patches for inner tubes			
Install routes + variations + respective offline maps on iPhone and iPad			
Install weather apps for destination			
<b>How to use this check list</b>			

Item	A	B	Comment
This list is made for 1 (A) or 2 (A+B) cyclists. Rows with "x" are items most likely to be considered. Only generic descriptions are used - brand names are not that important			
List contain does not contain specifics, eg tent means one of our tents. Also, selecting for the trip a gas stove would mean the fuel and spirit related items can be ignored.			
How we use the list : before packing, we indicate on the list which items we will take - we put a cross in the A or B column which items we will not take.			
We prepare our stuff based on the list and will only put a "Check mark" on the list when the items are packed or are on our packing table.			
we check the list again right before departure (if we do not forget)
